

- 1 [Feature Request] Dowel/center of gravity symbol
- 2 [Feature Request] QMdiArea supports two modes: tabbed and sub-window. Implement a way to toggle between them
- 3 DeprecationWarning: distutils package is deprecated and slated for removal in Python 3.12
- 4 [Feature Request] Implement Chip-breaking drill cycle (G73)
- 5 [Bug] Draft breaks the model and therefore breaking subsequent features
